Risk and Response Strategies

Risk ID	Cause	Effect	Response Strategy	Response Actions	Action	Risk Review
RISK 001	Inaccurate or outdated financial data from institutions	Poor user experience, reduced trust in platform	Mitigate	Implement basic validation checks for scraped data (e.g., checking dates, format consistency).	Development Team	Ensure accuracy by validating data regularly, monitor for discrepancies
RISK 002	Regulatory and legal compliance challenges	Legal penalties, platform shutdown	Transfer	Partner with legal consultants to ensure compliance; use trusted legal services for reviews	Legal Team	Review compliance biannually, adjust practices based on legal advice
RISK 003	Low user trust or adoption	Reduced user engagement, lower platform usage	Mitigate	Provide transparency on data sources, build partnerships with trusted institutions	Marketing & Partnerships	Monitor user feedback, adjust messaging and educational content as needed
RISK 004	AI/Algorithmic bias	Unfair product recommendations, user dissatisfaction	Accept	Keep the AI simple in early stages and adjust based on user feedback	Data Science Team	Quarterly review of AI decisions
RISK 005	Technical glitches or downtime	Service disruption, loss of users, reputation damage	Mitigate	Use reliable scraping tools and services to avoid downtime; Set up simple monitoring of the platform to catch downtime early.	IT & Operations Team	Conduct regular system tests, ensure recovery processes are fast
